

## JUP DAO LFG Round #2 Project Comparisons

	Solana ID by DSID	MONKEY DEX	NYAN HEROES	SANCTUM	SRCFUL	UPROCK
Project Description	Building an identity and reputation system for the internet that honors privacy for consumers while still providing enough data to service providers to make optimal decisions. Comparable to Honey, a rewards and discount browser extension.	Muliti-chain DEX with Perps and copy trading	Web3 team-based competitive shooter game featuring CATS PILOTING GIANT MECHS	Democratizes liquidity for Liquid Staking Tokens (LSTs) reducing the barriers to entry for more LST providers. More staked SOL = more decentralization.	DePIN community-driven virtual power plant. Members are rewarded for sharing their energy data in an open and transparent way. Aim to provide the means for decentralization, decarbonization, and digitalization of the energy system.	DePIN network fueling the AI internet future that simplifies the process of auto-earning tokens, staking them, and redeeming them for rewards. Users earn tokens by sharing their idle internet bandwidth and through staking.
Working Product	Proof of Concept	Yes	Yes. Pre-Alpha just ended.	Yes	Limited to Sweden ATM	Proof of Concept
Token Name	\$SOLID	\$MOGO	\$NYAN	Undisclosed	\$SRC	\$UPT
Total Token Supply	1,000,000,000	42,000,000 --> 21,000,000 (after buy & burn)	1,000,000,000	Undisclosed	250,000,000,000	1,000,000,000
Initial Token Supply	150,000,000	23,500,000	108,000,000	Undisclosed	Undisclosed	100,000,000
LFG (Public Sale) Token Supply	50,000,000	6,300,000	25,000,000	Undisclosed	12,500,000,000	100,000,000
Tokenomics	35% Community & LFG voting rewards	30% Team	30% Community Incentives	To be modeled after JITO and JUP but undisclosed at this time. See their 04/17/2024 Twitter/X post for a full explanation.	20% Srcful Founders	1% Advisors
